

EDUCATION**University of Illinois Chicago** - Bachelor of Science**Double Major:** Information & Decision Sciences and Finance | **Minor:** Marketing | GPA: 3.72/4.0 | Magna Cum Laude**Certifications:** Google Data Analytics Professional Certificate | **Leadership:** Co-Director of PR, Business Analytics Organization (UIC)**Chicago, IL, USA**

2022 - 2026

WORK EXPERIENCE**Ramani Global (Family Business)****Gujarat, India****Data Analyst**

2020 - Present

- **Reduced manual reporting time by 6 hours per week** by building SQL queries and Excel data models that automated cleaning and consolidation of sales, inventory, and procurement records across 5+ product lines.
- **Cut stockout incidents by 20% over two quarters** by developing time-series forecasting models in Python (pandas, scikit-learn) on 5 years of historical sales data to support inventory reorder planning.
- **Enabled faster weekly pricing decisions across 30+ SKUs** by designing interactive Power BI dashboards tracking pricing trends, margin performance, and competitor benchmarks.
- **Reduced month-end close effort by 30%** by automating financial reporting and ledger reconciliation in Python, performing variance analysis to surface cost discrepancies.

College of Business Administration @ UIC**Chicago, USA****Teaching Assistant**

2023 - 2026

- **Improved average exam performance by 15% across 200+ undergraduates** by leading weekly review sessions in Business Statistics, MIS, and Supply Chain Analytics, translating hypothesis testing, regression, and data interpretation concepts into actionable insights.
- **Evaluated 500+ student assignments per semester** using Excel, SQL, and statistical analysis while collaborating with faculty to refine course materials and rubrics.

Education Technology Lab @ UIC**Chicago, USA****Technical Support Analyst**

2023 - 2026

- **Reduced average ticket resolution time by 30% and system downtime by 40%** by analyzing 150 monthly incidents across 200+ endpoints, documenting recurring failure patterns to inform preventative maintenance.
- **Produced weekly incident reports tracking 5+ performance metrics** by maintaining structured ticket data and applying root-cause analysis to identify trends across hardware, software, and network issues.

PROJECTS**Vantage - AI Business Analyst Agent**

- **Built and deployed an agentic AI analytics application** using the Claude API, Python, and Streamlit that converts natural language questions into pandas code and chart outputs across arbitrary CSV datasets.
- **Reduced analyst time-to-insight from hours to seconds** by automating data parsing, visualization selection, and executive narrative generation through a multi-step LLM workflow.
- **Shipped through a full dev -> staging -> production** lifecycle on Streamlit Cloud with prompt evaluation, error handling, and version control.

Quarry - Chipotle (CMG) Financial Model & DCF Valuation

- **Built a 3-statement financial model and DCF valuation** for Chipotle Mexican Grill (NYSE: CMG) in both Google Sheets and **Python** implying **\$19.40/share vs. \$32.89 market (-41% downside)** across **Bull/Base/Bear scenarios**, by sourcing 5 years of 10-K data from SEC EDGAR and reconciling a 50-for-1 stock split and \$5.2B treasury retirement.
- **Validated model correctness with a 6-test pytest suite** (balance sheet integrity, scenario ordering, UFCF sign, cash non-negativity) and deployed an **interactive Streamlit dashboard** showing real-time scenario toggling, DCF breakdown, and balance-check integrity metric.

A/B Testing Evaluation - Homepage Redesign

- **Measured a +63.4% relative conversion lift** (0.40% -> 0.65%) across 50K users with a 95% confidence interval of [+0.12pp, +0.38pp], delivering a SHIP recommendation in a one-page executive summary.
- **Designed an end-to-end A/B testing framework** in Python and SQL, including SRM validation, contamination audits, and pre-registered ship criteria to ensure statistical rigor.
- **Quantified secondary impact** on CTR (+14.6%) and segmented results by user cohort to support full rollout decision-making.

KPI Framework & Metric Ownership - Marketplace Analytics

- **Analyzed 206K customers and 3.4M orders to define a North Star metric** (Value per Active Customer), uncovering that 41% of users drove 82% of orders and identifying retention as the highest-impact growth lever.
- **Created a KPI ownership framework** using SQL and Python (OOP), with documented metric contracts, validation checks, and driver-tree decomposition into purchase frequency and basket depth.
- **Automated weekly business reviews** delivering executive dashboards, driver waterfalls, and stakeholder-facing anomaly monitoring to support data-driven decisions.

Demand Forecasting Time Series (M5 Walmart Data)

- **Achieved 13.51% MAPE** across 30 store-category segments, outperforming retail benchmarks of 15 - 25% and translating to an estimated \$2.7M annual inventory planning ROI.
- **Programmed an end-to-end Python forecasting pipeline** benchmarking ARIMA, XGBoost, and baseline models using leakage-free rolling backtests and standardized evaluation (MAPE, RMSE, MAE).
- **Engineered time-series features** including lag variables, rolling statistics, and calendar effects to capture seasonality, trend, and holiday-driven demand patterns.

SKILLS & INTERESTS**Technical Languages & Databases:** Python, SQL (PostgreSQL/MySQL), R, NoSQL, Shell Scripting**Analytics & Statistical Modeling:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Hypothesis Testing, Regression, A/B Testing, Time Series Forecasting, Predictive Modeling, Cohort & Funnel Analysis**Cloud & Data Engineering:** BigQuery, ETL Pipeline Development, Data Architecture, Warehousing, AWS, Azure, GCP**BI & Visualization:** Power BI, Tableau, Looker, Advanced Excel, Interactive Dashboard Design, KPI Frameworks, Data Storytelling**AI Implementation:** Claude API, Agentic LLM Workflows, GenAI, Streamlit, Prompt Engineering**Financial & Strategic Operations:** Financial Modeling, Variance Analysis, Ledger Reconciliation, Stakeholder Management**Developer Tools:** Git, Jira, Agile Methodologies, Linux Environments
